Post-Intervention Assessment Plan
Technology to Promote Independent Housing Project
WIHD

When your team has completed provision of AT and necessary training and follow-up for a participant in the project, provide Jeremy at WIHD with a report that **lists**:

(1) Participant name, address, age, health status, medical diagnoses, living situation
(2) All AT provided and brief rationale for providing it (**SHAPI** and **SHINY** instruments or other)
(3) Dates of assessment and intervention visits
(4) Any notes, photos, videos or other documentation that may help in completing reporting for this participant

Please then, also:

(1) Notify Tony that you have completed the smart home intervention with this participant (logentry@vcu.edu or (804) 840-6900).

(2) Tony will work with you to plan a home visit outcomes assessment for the participant no sooner than 60 days after completion of the intervention.

(3) Working with Tony, contact the participant to remind them of the outcomes assessment and schedule a suitable date/time for all parties. *Try to schedule visits so most or all now completed can get done in a single visit (will be driving up from Virginia).*

Tony's Plan for each Participant:

(1) Collect assessment and intervention information from WIHD
(2) Collaborate with you to plan a home visit outcomes assessment date/time.
(3) Contact participant to confirm planned visit.
(4) Conduct outcomes assessment (see assessment list below) in 1-2 hour home visit.
(5) Analyze assessment/intervention/outcomes data for final report, including a written narrative case history with photo/video, as available
(6) Provide WIHD with all materials from outcomes assessment, including final report

Outcomes Assessment Measures and Procedures:

(1) Follow-up SIS conducted by AAIDD
(2) **SHUSS-NY** rating instrument
(3) Participant demonstrates use of provided technologies
(4) Notes on participant's satisfaction/perceptions of smart home supports
(5) Photos/videos of participant using smart home supports
